#### Talk about Powell Notes

- Talk about what he said and if we want to tackle any of these ideas.
- Simplify app
  - Removing 'Pomodoro', 'Short break', 'Long Break' title vs keeping it
    - Compromise: hide this title when user starts their session
  - Adding count of tomatoes as the user completes pomos
  -

#### Sprint review

- How did it go
  - Mobile integration - pretty much done
  - End to end testing - still ongoing
  - Finish Task button - done
  - Onboarding Documentation edits - still working on it, will be done Monday
  - Timer's Throttle bug - mostly completed, still has bug with negative values
  - Background notifications - mostly completed, still working on focus
  - 100% HTML valid - still ongoing

#### Sprint Retrospective

- Retrium

#### Next Sprint

- Pair programming and what are our values?

#### Not finished from last sprint (Highest priority):

- End to end testing - Mark Chris (Long)
- Background Notifications - Alan Luke (smaller)
- Keyboard accessibility - Liam Luke (smaller) -link with mac user
- Onboarding documentation - Mesa Liam (medium)
- Timer throttle bug - Chris Luke Alan (could be small could be large)

- 100% HTML valid - Xingyu Alan (longer)
  - W3 validator
  - Divitis

Todo:

Medium priority:

Powell changes (main page organization and timer page organization) \*\*\* (medium)

- Main page redesign Xingyu Mark Luke Mesa
  - Shrink top left text/change to brand icon
  - Center enter name/resume task button
  - Reorganize where the 25 min work/5min break will go
  - Remove home icon from home page
  - Create new session button when no resume session button is available
- Timer page Steven Alan Chris Liam
  - Display remaining planned pomos - Meshach (medium)
  - Shrink top left/change to brand icon
  - Delete pomodoro/Make break title disappear when timer starts
  - Make timer bigger
  - Graph makes live edits while you work on tasks
  - Add message for finishing task when all pomos are done

Repository clean up (powell notes)

Fix Resume session state (go to pomodoro state not break state)

- UI themes Mesa Chris Mark (Long)
- At least 1 new background (bright color)
    - Use different css classes, add them programmatically
  - Some new icons for tomatoes (3 new things?)

Low priority:

- Audio notifications \* Alan Luke (small - medium)
- Analytics? (low priority for now)
